

## Project #01

Your manager wants to collect the disk usage stats every hour (15th minute) for the root filesystem. Your manager wants you to write the information to a file in the following format:

**[Date & Time Stamp]:[Volume Mount Point]:[Used Space]:[Available Space]**

You are expected to log any error that might occur while executing the script to "errors.log".

You are expected to deliver the following:

- The script
- cron entry details.
