Assignment #1

Create a separate user account for this assignment.

Make the following customizations to your bash shell environment:

- Change the shell prompt to display the IP address (ex: 10.1.2.3: $)

- Display the following message when the user logs in for the first time:

  - "Welcome to Linux. You are logged in now!"

- Display the following message when the user logs out:

  - "See you later!"

- Create the following aliases:

  - c for clear

  - .. for "cd .."

  - .3 to cd back 3 directories

  - .4 to cd back 4 directories

  - h for history

  - ports for "netstat -tulanp"

- Make all the aliases permanent.
